

I am served by Radio station K-LOVE on 90.1. Without translators I would not have a clear signal. I would not have anything worthwhile to listen to without this fine radio station. The music and conversation is uplifting and good for me. As different from the trash and so-called commercial drivel you license on other freq. Please do not take K-love down by re allocating the low power freqs to something else that will only serve the purient interests of the few. This is one station that truly serves the public interest, convience and nesessity.
